ISE Certification Installation Guide for Mac

Network Team

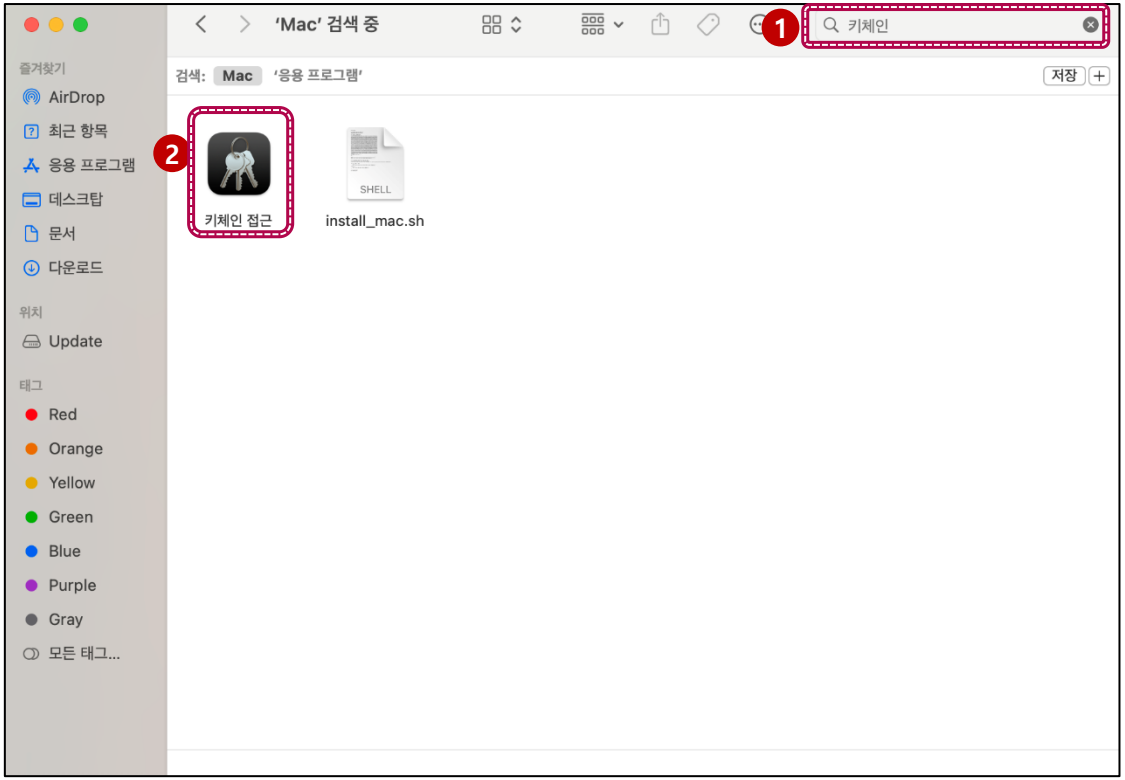

1. Install the certificate file

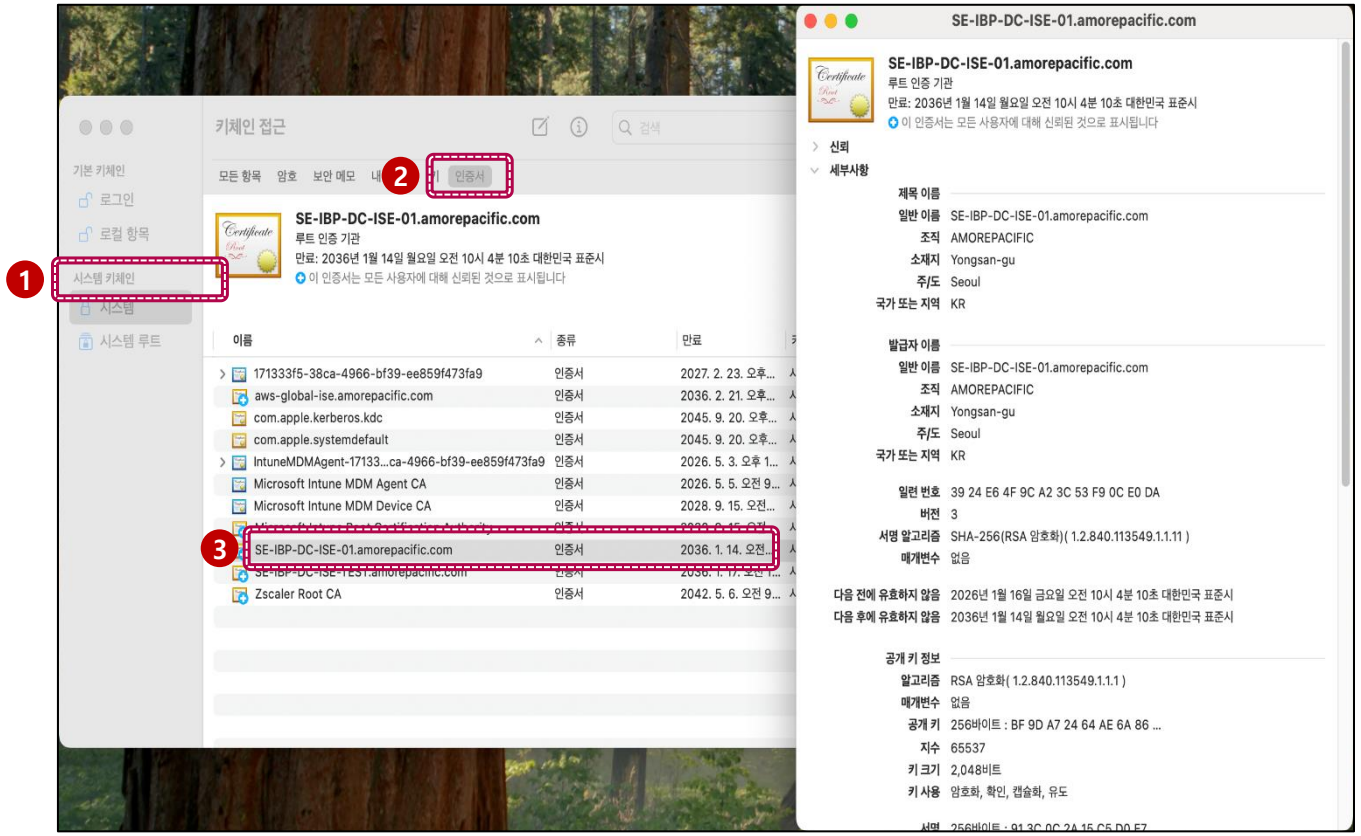

1. Save the certificate file in the Downloads folder.
2. Open the Terminal and enter the following commands:
   - ① To locate the downloaded certificate file: mdfind –name SE-IBP-DC-ISE-01.cer
   - ② To navigate to the directory where the certificate is located: cd Downloads
   - ③ To install the certificate: sudo security add-trusted-cert -d -r trustRoot -k /Library/Keychains/System.keychain SE-IBP-DC-ISE-01.cer
   - ④ Password: Enter your account password.

2. 인증서 설치 확인

1. Search for "Keychain" in Finder.
2. Double-click "Keychain Access."

2. 인증서 설치 확인

1. Click "System" in the left-hand menu of Keychain Access.
2. Select the "Certificates" tab from the top menu.
3. If you see the "SE-IBP-DC-ISE-01" certificate (Expires Jan 14, 2036), the installation was successful.

3. 새로운 인증서 적용

1. After the certificate update (Post-April 19th), a certificate verification window will appear when connecting to the internal Wi-Fi (APG_OFFICE). Please click "Continue."
2. Enter your account name and password in Keychain Access, then click "Update Settings."

Note: The certificate verification prompt will only appear during your first Wi-Fi connection after April 19th.
