ISE Certification Installation Guide for Windows

Network Team

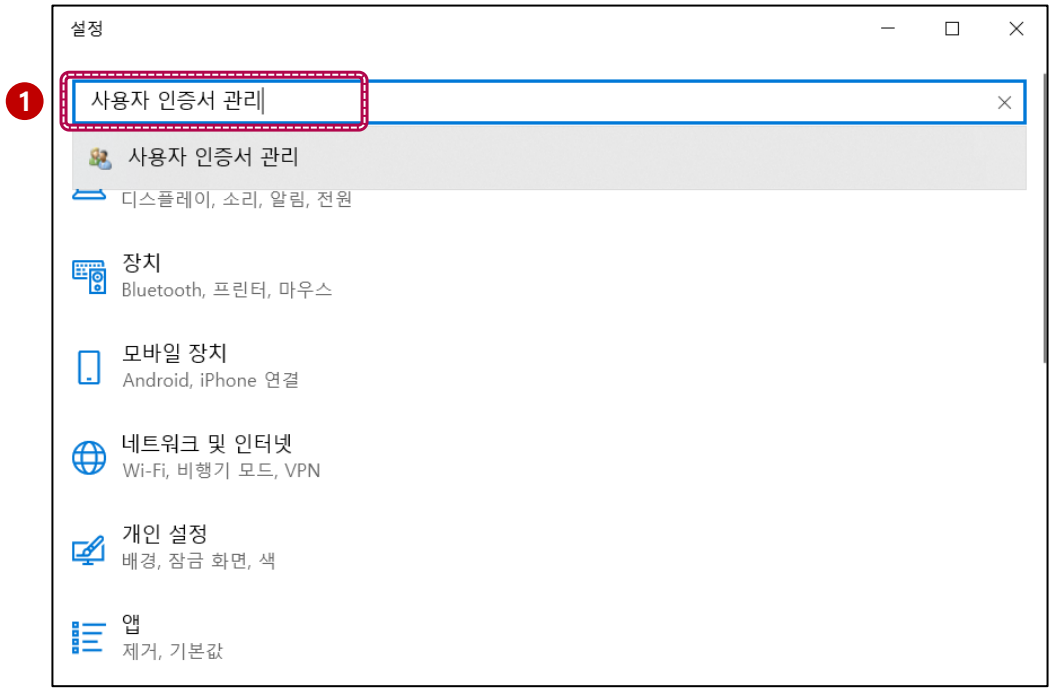

1. Install certificate file

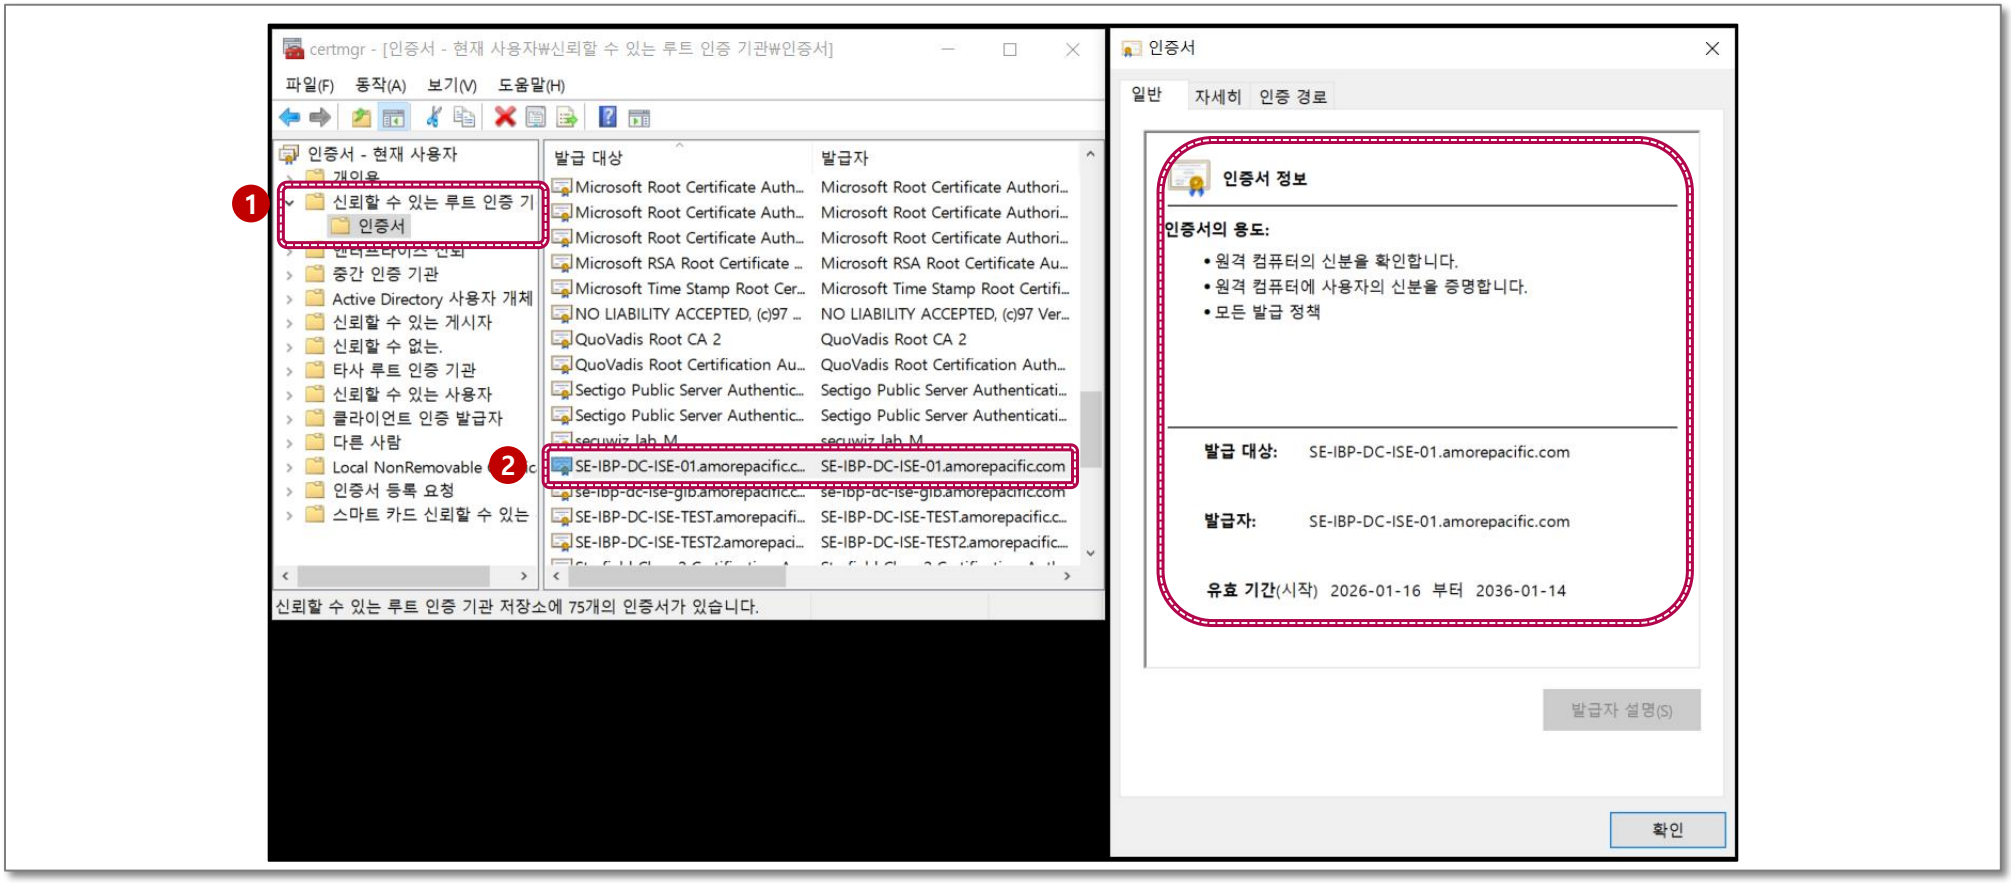

1. Save the certificate file from https://aplink.kr/rq6j7Fu to your download folder and extract it.
2. Right-click the Win_SE-IBP-DC-ISE-01.bat file in the extracted folder and click "Run as administrator".

2. Verify certificate installation

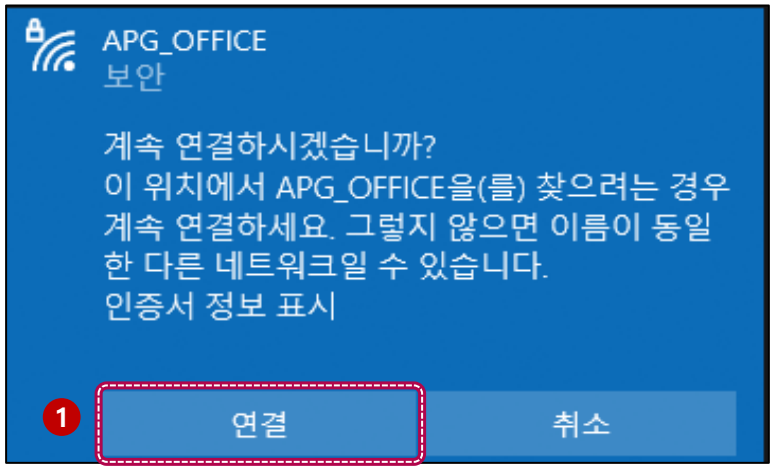

1. Run Control Panel – User Certificate Management.

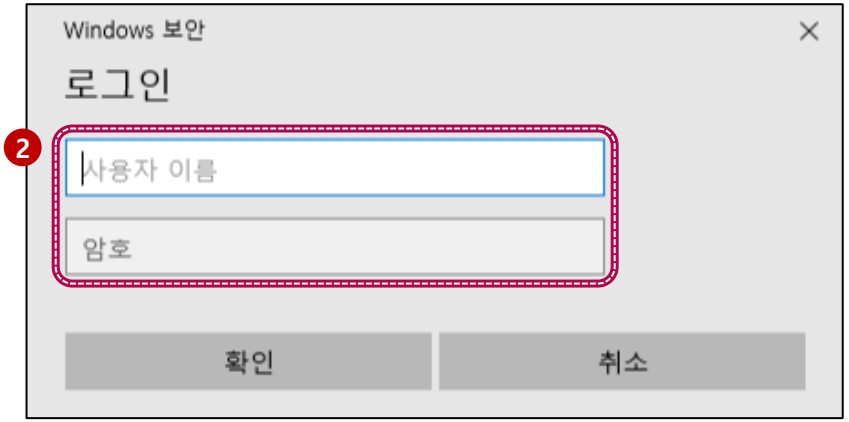

2. Verify certificate installation

1. Click Trusted Root Certification Authorities – Certificates.
2. Check if the installed "SE-IBP-DC-ISE-01.amorepacific.com" certificate exists.
3. If the SE-IBP-DC-ISE-01 (expired 2036.1.14) certificate is visible, the installation was successful.

3. Apply new certificate

1. After replacing the certificate (after April 19), a certificate verification window will appear when you connect to the company WiFi (APG_OFFICE). Click Connect.
2. When the ID/PW input window appears, please enter the information as follows:
   - Personal PC: Account pc_Employee ID, Password amore1234!
   - Public PC: Account pc_SPC Asset Number, Password amore1234!
3. **※ Certificate verification occurs only on the first wireless connection after April 19.**
